
COMP 2406

Fundamentals of Web Programming

Course Notes

Notes by Mark Lanthier (W2026 version)

(This material is based on lectures slides from **Alina Shaikhet** as well as material from **Ava McKenney** and **Lou Nel**. Some material has also been A.I. generated.)

Table of Contents

Chapter 1 - Fundamentals of Web Programming	1
1.1 Internet History	2
1.2 Web Programming	3
1.3 Course Overview	5
Chapter 2 – HTML	7
2.1 The Basics	8
2.2 Other Common HTML Tags	17
2.3 Images, Links and Forms	22
Chapter 3 - Cascading Style Sheets	29
3.1 The Basics	30
3.2 Our First Website – Content Only	35
3.3 Our First Website – Appearance	46
Chapter 4 – JavaScript	54
4.1 The Basics	55
4.2 Running JavaScript Code	57
4.3 Variables, Constants, Types and Conversion	61
4.4 Strings, Arrays, Conditionals and Loops	65
4.5 Objects	68
4.6 Functions	69
4.7 Shallow and Deep Copies	71
4.8 Variable Scoping	75
4.9 Higher-Order Functions	76
4.10 Synchronous vs Asynchronous Code	78
4.11 Closures	81
Chapter 5 – The Document Object Model	85
5.1 The DOM	86
5.2 Changing Element Contents and Attributes	92
5.3 Reading and Changing CSS Classes & Styles	94
5.4 Adding and Removing Elements	97
5.5 Event Handling	99
5.6 Our First Website (continued) – Behavior	106
Chapter 6 – Client-Server Communication	116
6.1 Client-Server Architecture	117
6.2 Communication Basics	122
6.3 The Hypertext Transfer Protocol	127
6.4 Domain Name System (DNS) and URLs	131
6.5 Structure of HTTP Requests and Responses	135
6.6 URL Shortening & Caching	142
Chapter 7 – AJAX	145
7.1 AJAX Basics	146
7.2 Promises	151
7.3 Trivia Database Example	158
7.4 Team Members Example	163
7.5 Limitations	169

Chapter 8 – Node.js and NPM	171
8.1 Node.js Architecture	172
8.2 Event Loop Processing	176
8.3 The Modules System of Node.js	181
8.4 Creating Servers	185
8.5 Handling Request Data	190
8.6 Node Package Manager (NPM)	195
Chapter 9 – Template Engines	201
9.1 Generating Dynamic HTML with JavaScript	202
9.2 Embedded JavaScript Templates (EJS)	213
9.3 PUG	226
9.4 Updating the FutureTech Corp. Site	239
Chapter 10 – Express	253
10.1 Express Intro	254
10.2 More About Middleware	262
10.3 Bodies and Query Strings	268
10.4 A FutureTech Corp. Express PUG Server	277
10.5 Sample Store Site and the Postman Tool	279
Chapter 11 – RESTful Web Design	285
11.1 RESTful APIs	286
11.2 Designing RESTful APIs	292
11.3 Practice Exercise - Date-a-Science Website API	297
Chapter 12 – The MongoDB DBMS	305
12.1 Database Introduction	306
12.2 Working with Databases in a MongoDB Shell	308
12.3 MongoDB in Node.js	322
12.4 Products Management Site Example	330
Chapter 13 – Authentication, Authorization & Sessions	339
13.1 Authentication and Authorization	340
13.2 Sessions and Cookies	342
13.3 Middleware: cookie-parser & express-session	347
13.4 Example: Handling Login Sessions	353
Chapter 14 – Mongoose	358
14.1 Mongoose Connections	359
14.2 Data Validation Using Schemas	360
14.3 Server Queries	370
14.4 Instance/Helper Methods and Populating	378
Chapter 15 – Mobile Apps	384
15.1 Mobile Vs. Desktop	385
15.2 Responsive Web Design	388
15.3 Chrome Dev Tool Device Simulation & Emulation	390
15.4 Viewports	396
15.5 Media Queries	401
15.6 Responsive Images	407
