

March 31, 2021

Dear Mr. Clark Bains,

Thank you for your dedication and contribution as a TA in the School of Computer Science. I would like to congratulate you on being selected as one of the nominees for the **School of Computer Science Outstanding Teaching Assistant Award** for the 2020-21 academic year. Your support and efforts did not go unnoticed, as evidenced by nominations and comments of praise from one student who appreciated your hard work and commitment this term. Regretfully, you were not selected as this year's winner because there were many nominations and we could only select one undergraduate TA and one graduate TA for the award. But that should in no way diminish your outstanding efforts this term. Please accept our warmest appreciation for your hard work.

The following feedback about your performance was presented to the selection committee:

"Clark gives great feedback on submitted assignments/tutorial and clearly outlines areas of improvements as well as telling you what you did well."

"Clark was the only TA to record his workshop videos and he uploads them instantly which allows students to follow along on their own time or revisit some parts when required. It's clear that he puts a lot of time and effort into his workshop."

"Clark provides students with help and advice outside his TA hours."

Thank you for your dedication as a TA in the School of Computer Science and congratulations on a job well done!

Sincerely,

Michel Barbeau, Professor and Director

School of Computer Science, Carleton University
